

Student Accommodation in Manchester's Victoria Park Area

Today Manchester has become a vibrant and energetic city and the home for several well-known universities and students who live there during term time.

In Manchester, one of the student residential schemes where Jackson maintains the lifts is Victoria Point, a group of six, apartment blocks, each with a lift. The blocks were built specifically for student occupancy and comprises of both studios and apartments. Situated in the Victoria Park area of Manchester, the accommodation is convenient for students studying at The University of Manchester, Manchester Metropolitan University and the Royal Northern College of Music.

Our Manchester team who won the initial award, were very pleased when our subsequent tender submission was again, awarded to Jackson for the maintenance of the six MRL lifts.

There are many environments where lifts are needed 24/7 and residential properties are just one. Student accommodation falls into this category, providing easy access for those with limited mobility or simply those moving in or out and carrying heavy luggage.

Jackson have been maintaining the lifts at Victoria Point for several years following on from our initial competitive tendering submission. Our Manchester team who won the initial award, were very pleased when our subsequent tender submission was again, awarded to Jackson for the maintenance of the MRL lifts.
